Education

CARNEGIE MELLON UNIVERSITY, HEINZ COLLEGE — Pittsburgh, PA, USA
Master of Information Systems Management — August 2026 – December 2027

- **Coursework:** Introduction to Machine Learning (10601), Generative AI Lab (94844), Intermediate Database Management (95813), Time Series Forecasting with Python (95835), Responsible AI (94885)

PES UNIVERSITY — Bengaluru, India
Bachelor of Technology in Computer Science and Engineering | GPA: 3.56/4.00 — August 2019 – May 2023

- **Coursework:** Python, Data Analytics, Database Management Systems, Design and Analysis of Algorithms

Skills

Programming & Development: React, Angular, TypeScript, Node.js, Express.js, REST APIs, Python, HTML, CSS
AI & Data: RAG pipelines, LLM API integration, SQL, Power BI, Data Visualization, Dashboard Design
Cloud & Observability: Docker, OpenTelemetry, OpenSearch, Grafana, Redis, CI/CD (Jenkins), AWS

Experience

Rakuten India — Office of the CIO, Rakuten Group — Bengaluru, India
Software Engineer — July 2023 – July 2026

- Led **QCC Workflow Automation**, an approval-workflow platform adopted across Rakuten Group divisions worldwide; re-architected its AI layer from a single text-completion call into a **RAG pipeline** over years of historical consultant feedback, cutting manual review time by **25%**
- Engineered the Angular frontend and Node.js services for QCC, integrating **OpenAI models** through Rakuten's internal API gateway to assist consultants in drafting grounded, consistent feedback
- Delivered **20+ proof-of-concept deployments** for external enterprise customers on **Rakuten SixthSense**, a commercial full-stack observability platform, across Application Observability and Log Monitoring
- Constructed custom **OpenTelemetry** telemetry components resolving client-specific instrumentation gaps that native agents did not cover, accelerating early product adoption
- Developed the **React** frontend, REST APIs, and database layer for Rakuten Group's company-wide **OKR platform**, used by teams across Japan, India, and APAC
- Cached query results and sessions in **Redis** to cut repeat database reads, and instrumented the platform with **OpenSearch** and **Grafana** for log monitoring
- Built **Jenkins** CI/CD pipelines running automated tests and deploying **Dockerized** microservices to on-premise staging and production environments on merge, replacing a fully manual release process

Rakuten India — Bengaluru, India
Software Engineer Intern — January 2023 – June 2023

- Launched the first version of the QCC Workflow Automation platform, automating manual consultant approval workflows
- Implemented UI components and REST APIs using **React** and **Node.js**; converted to a full-time offer

Diageo India — Bengaluru, India
Business Analyst Intern — June 2022 – August 2022

- Designed an IT Service Management **Power BI** dashboard visualizing operational and incident metrics
- Integrated **ServiceNow** data to surface ticket volumes, resolution times, and SLA compliance, and presented recommendations that improved IT support visibility

Projects

Automated Grading System — Undergraduate Capstone — 2023

- Trained **Random Forest** and **LSTM** models to score student submissions automatically, reducing manual evaluation effort

Achievements

- Awarded a **25% Merit Scholarship** by Carnegie Mellon University for the MISM program
- Recognized at Rakuten India for leading the QCC Workflow Automation initiative
- Promoted from Associate Software Engineer to Software Engineer at Rakuten India
